Berger Manufacturing has been providing products and services in Silicon Valley since 1974. We are the logical partner to companies requiring high quality manufactured sub-systems to deliver their core competencies.

■ Sub-System Assembly and Contract Manufacturing

Berger Manufacturing offers services in engineering, design for manufacturing (DFM) and new product introduction (NPI). Working in tandem with our customers with an understanding of their needs allows Berger Manufacturing to add value at multiple stages of product development and manufacturing. Berger Manufacturing is ISO registered and has an active process improvement program.

Our 47,000 square foot assembly facility in San Jose, California, is supported by our 35,000 square foot comprehensive CNC fabrication facility, providing plenty of room for both large and small scale products.

■ Quality Assurance

Developing optimized quality programs for their products keeps our personnel dynamically involved with our customers throughout the production cycle.

■ Logistics Management

Berger Manufacturing uses state-of-the-art software to manage and control project assignments. In addition, our ability to provide rapid implementation and quick response to changes builds strong relationships with our clientele. Our experienced procurement staff efficiently manages material, obtaining supplies based upon your needs, thus ensuring on time deliveries.

At Berger Manufacturing we are committed to unsurpassed customer service and satisfaction.

BERGER MANUFACTURING

CONTRACT MANUFACTURING SERVICES

Our in-house capabilities insure that our customers will receive the highest quality products in a cost effective and timely manner.
